Dear Valued Customer,

As a supplier and filter maintenance organization, we have been keeping a close eye on the spread of COVID-19 (Coronavirus). Our primary concern is always the health, safety and well-being of our employees and customers. We have taken measures to keep our operations running while minimizing the infection risk, including employee education and restricting visits to our offices.

Our customer service, filter technicians, and delivery drivers will continue to provide you with high quality service, while respecting any visit restrictions that your companies may put in place. We will continue to monitor and communicate information received from the Center for Disease Control and Prevention and the World Health Organization to educate our teams.

Dayton Reliable Air Filter is recommending ASHRAE's website which has a page with COVID-19 outbreak resources at ashrae.org/COVID19. ASHRAE offers these documents to provide guidance on COVID-19 concerns in the operation of HVAC systems of which our filters are a part. Included on the page is ASHRAE's position document on Airborne Infectious Disease approved by their BOD last month. Drafting these documents are individuals from all over the world, including many from the CDC, hospital managers, insurance companies, etc.

As of today, we do not have any disruptions in the raw materials used in the manufacturing of our products. We have multiple suppliers, carriers, and manufacturing facilities to ensure business continuity. We are also ready to increase stock of any products as we see the need.

We appreciate your continued support. All deliveries will continue and filter change out service performed.

Stay Healthy,

Dayton Reliable Air Filter
